Amber Carroll takes inspiration from international runway houses, for a more wearable take on metallics...

## 1. HOW TO: GLITTERING GOLD

For those wanting to pay serious homage to the disco era, Amber says the trick is to keep things tidy. "Use eyelash glue on the inner corner of the lids to adhere the glitter pigment to the skin and use sellotape underneath the eye to clear any glitter that drops onto the skin," she says.

## 2. HOW TO: BURNISHED RUBIES

Shimmering eyebrows can give the face an all over glow. To get the look, Amber mixed together rich gold loose pigment powder and *MAC* Fix Spray, then combed the mixture generously through the model's eyebrows.
